Profile

Passionate software developer with 5+ years of programming experience with a wide range of technologies. Always excited to learn new skills and methodologies. A detailed-oriented individual who is always ready to take on new challenges, particularly projects from conceptualization to completion and has the motivation and ambition to develop new projects to make this world an amazing and hopeful place.

Skills

- | | | | |
|----------------------------------|---------------------------|-----------------------|------------------------|
| • Project Management | • Spring Boot 3.2 and 2.7 | • AWS S3 | • Redhat Openshift |
| • Web Development | • Bootstrap 5 | • AWS EC2 | • IBM Load Balancer |
| • Agile methodologies | • Figma | • AWS IAM | • IBM LogDNA |
| • Cross-functional collaboration | • Tailwind 3 | • AWS Lambda Function | • Database Management |
| • Problem-solving | • Angular Material | • Cloud Computing | • MySQL 8 |
| • Consulting | • Git | • DevOps | • MariaDB 10.5 |
| • Angular.js 18 | • REST APIs | • CI/CD | • OracleSQL |
| • React.js 18.2 | • Java 21 | • Docker | • Unit testing |
| • Next.js 14.2 | • Python 3 | • Jenkins | • MongoDB 5 |
| • Vue.js 3.3 | • Flask 2.3 | • IBM Watson | • Serverless functions |
| • Adonis.js 4 | • Selenium 4.8 | • IBM Db2 Warehouse | • Webhooks |
| • Node.js 22 | • Unit testing | • IBM Cloud Foundry | • Jira |
| • Express.js | • SonarQube | • IBM Object Storage | • Shopify |
| | • Postman | • IBM Cloud Functions | • Zappier |

Professional Experience

Wizeline Guadalajara, *Senior Software Engineer*

July 2023 - *Current*

- Led the design of scalable, multi-tenant web applications using React with server-side rendering, integrating Node.js backend services and deploying on AWS EC2 with high availability via Load Balancers.
- Established a rigorous testing pipeline with unit and end-to-end tests, significantly reducing production bugs and ensuring a seamless user experience.
- Optimized AWS infrastructure to support high bandwidth demands, automated deployment processes, and proactively monitored system health to ensure optimal performance.
- Guided and mentored junior developers in best practices, code reviews, and advanced technical concepts, fostering a culture of continuous learning and promoting team collaboration to drive project success.
- Developed and implemented an enterprise-level application using Spring Boot, tailored for a large-scale international service provider. This solution, running on **on-premise servers**, was crucial in maintaining high availability and data sovereignty, meeting specific compliance requirements.

IBM (International Business Machines Corporation) Guadalajara, *Full Stack Developer – Technical Owner delegate – Jr. Solution Architect*

February 2021 – May 2023

- Streamlined the purchase process and enhanced productivity for financial support teams by implementing web technologies and orchestrating multiple systems across the company.
- Evaluated operational processes as the Technical Owner and implemented changes to ensure compliance with industry regulations and standardization protocols.
- Assembled financial processes automation using AI, reducing the time spent on creating purchase orders and financial reports, while also improving the tracking of order statuses. Developed tools for accelerated financial data analysis and reconciliation.
- Designed and implemented IBM Cloud and Red Hat OpenShift CI/CD pipelines for accelerated software delivery, testing, and deployment. Improved development cycles, QA, and release management.

- Played a key role in designing and maintaining the infrastructure of IBM Cloud, ensuring its optimal performance and scalability. Implemented technologies such as IBM Load Balancer and LogDNA to monitor and maintain the health of the infrastructure.

One Primal Guadalajara, *Full Stack Developer – Solution Architect*

June 2020 - February 2021

- Spearheaded the design, implementation, and ongoing maintenance of robust cloud infrastructure for digital solutions, leveraging cutting-edge technologies such as Digital Ocean, React, and Express.
- Seamlessly integrated projects with servers using Docker, ensuring efficient deployment and scalability of web applications.
- Led backend development for web platforms and applications, delivering high-performance solutions that meet client requirements and industry best practices.
- Developed APIs using Node.js and proficiently utilized SQL and NoSQL databases, delivering reliable and efficient data management solutions.

JN & Associates - *Freelance Software Engineer*

January 2018 – Present

- Software design services for numerous clients including Agua Marina, SOS Diesel, Geomar Consultores, INA, Woof & Cups, Café Ole, MasIndustrial, Agencia Mano, and particular clients.
- Led a team of 4 people to manage, operate, and support a comprehensive web platform serving as the operational hub for a business. This platform facilitated efficient management of sales records, inventory, online sales, human resources, and the front-end website.
- Designed and architected a scalable solution, leveraging diverse applications and AWS services, including S3 and SQL databases, to achieve the envisioned system. Orchestrated the seamless integration of these technologies to ensure optimal performance, reliability, and scalability.
- Built a web application for e-commerce using web technologies such as Vue.js, Express.js, and MongoDB. Integrated a sophisticated affiliate marketing system, discount management functionality, and a credits system to deliver a seamless user experience. Implemented robust features for tracking affiliates, managing personalized discounts, and facilitating credit-based transactions.

Education

Universidad Autónoma de Guadalajara (UAG), Zapopan

Software Engineering Major, June 2022

- Honors Student.

Languages

- Spanish: Native
- English: Bilingual

Certifications

• AWS Certified Solutions Architect - Associate (SAA-C03)	May 2024
• Containers & Kubernetes Essentials, IBM	January 2022
• People Skills - Resilience, Growth Mindset, Learning Agility, Time Management	July 2021
• Watson Assistant Foundations	June 2021
• Watson Discovery Foundations	June 2021
• Watson and Cloud Foundations	June 2021
• People Skills - Communication, Presentation, Collaboration, and Problem Solving	May 2021
• Enterprise Design Thinking - Team Essentials for AI	March 2021
• IBM Carbon Design System Developer Essentials - React	March 2021
• DevSecOps Essentials	February 2021
• IBM Agile Explorer	February 2021
• Capstone: Retrieving, Processing, and Visualizing Data with Python	September 2020
